

# Agentic SOC

## Dropzone AI speeds up and improves the entire spectrum of detection and response

SOCs have made great strides in the last decade, but AI-powered attacks are more voluminous and sophisticated than ever before. The traditional SOC is unable to keep up.

Dropzone’s Agentic SOC deploys AI agents that autonomously collaborate to speed up and improve functions across the entire spectrum of detection and response. Dropzone’s AI agents investigate alerts, respond to emerging threats, hunt threats, and more so your SOC can expand coverage and accelerate response without scaling headcount.

### Benefits

<p><b>Proactive Defense at Machine Speed</b></p> <p>Dropzone’s AI agents collaborate 24/7 to proactively respond to emerging threats and hunt attackers. Autonomous alert investigations ensure excellent coverage, consistency, and context.</p>	<p><b>Ready to Work Immediately</b></p> <p>Dropzone is ready on Day 1 integrating into your existing tools. AI agents start work immediately, and fit into your existing workflows so there’s no disruption.</p>	<p><b>Tribal Knowledge That Scales</b></p> <p>As the AI agents work, they learn and remember details about your environment. You can also coach the agents on your procedures and add context in natural language.</p>	<p><b>10x SOC Your Capacity</b></p> <p>With Dropzone, your human analysts move from reactive frontline work to higher-value oversight—directing AI SOC agents that execute investigations and threat hunts at machine scale.</p>
<p></p> <p><b>Prioritization of real risk</b> 5x MTTR speedup</p>	<p></p> <p><b>Time to Value</b> Fits existing SOC workflows (SIEM, SOAR, ticketing)</p>	<p></p> <p><b>Analyst time recovered</b> 90% reduction in time spent on human investigation</p>	<p></p> <p><b>Faster decisions</b> 45-61% faster escalated alert reviews</p>

“With Dropzone, we’ve measured a five-fold speed up in our MTTR—improvements that we’ve validated through our purple team exercises.”

**Andrew Marsh**  
Director, Information Security

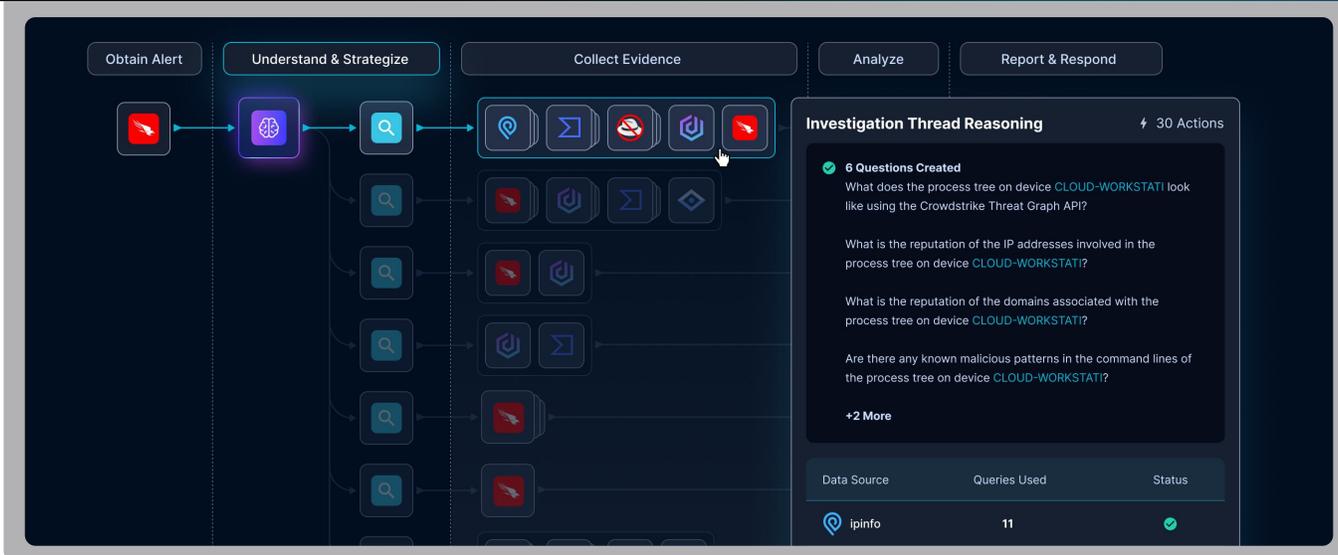

“Dropzone AI allows us to improve our security posture while remaining a lean and highly efficient team.”

**Isaac Pedisich**  
Sr Software Engineer

DROPZONE'S AI SOC ANALYST INVESTIGATES INCOMING ALERTS USING THE SAME TECHNIQUES AND TOOLS AS ELITE ANALYSTS.

## Key Product Details

**Self-agency** – Humans are not required to make agents work together. Agents take initiative to get work done faster and on their own.

**Autonomous alert investigation** – The AI SOC analyst replicates the techniques of elite analysts to give each alert a thorough and consistent investigation.

**Autonomous threat hunts** – Threat hunting now has all the human ingenuity and insight minus the drudgery. Run hypothesis-driven hunts in a fraction of the time.

**Human strategy driven** – Dropzone is easily customizable so that you can give the system instructions in natural language.

**Ready Day 1** – Dropzone works out of the box and gets better with time. We can onboard in hours.

**Emerging threat response** – Threat intelligence is operationalized and acted on 24/7 even while you sleep.

**Round-the-clock coverage** – AI works 24/7 for easy follow-the-sun coverage.

**Take action on threat intel** – Dropzone's TI Agent autonomously creates hunt packs for the Threat Hunt agent.

**Integrations** – Dropzone supports 90+ integrations to help ensure that your tech stack is covered.

## Pricing

An annual contract includes the complete solution, including:

- ✓ Up to 4,000 full investigations per year per AI analyst
- ✓ Unlimited users
- ✓ All available security alert categories
- ✓ All pre-built integrations with your security and data tools
- ✓ Hand-picked threat intelligence and enrichment feeds
- ✓ AI chatbot for ad-hoc investigation
- ✓ Interact with engineers for support
- ✓ 8-hour customer support SLA

## Built for Trust

### Security

We use a single-tenant architecture and are SOC 2 Type II certified.

### Transparency

We provide proof of evidence for every investigation and chat response.

### Privacy

We only use your private data for your own investigations, not to train our models.

Dropzone AI

**"Easy to use, easy to setup, extremely effective. Went from multiple thousands of alerts a month to only a few a day that are all meaningful."**
